EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Majcher on April 6, 2004.

In the beginning of the Specification enter:

--This application is a divisional of application Ser. No. 09/439,692, filed November 15, 1999, now U.S. Patent No. 6,264,671.--

The following is an examiner's statement of reasons for allowance: All independent claims recite, "Attaching the sheath proximal end to the deployment catheter distal end," which overcomes most stent and delivery systems. Although the Mackenzie (US 6,019,777) patent meets this specific limitation, it fails to disclose or suggest all of the limitations of claim 56 including, "disposing the stent within the sheath." The prior art of record fails to disclose or suggest all of the limitations of claim 57 including, "retracting the delivery catheter to allow the entire intravascular device to expand against the vessel wall at the intravascular site." The prior art of record fails to disclose or suggest all of claim 60 including, "the deformable member is embedded into

the wall of the sheath...and expanding the sheath against the vascular wall at the intravascular site to trap the plaque therebetween."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
